Software Proficiencies: GitHub, Excel, Word, PowerPoint

Projects and Relevant Experience

Mixed Fractions Calculator | Software Engineering

Oct 2023 – Dec 2023

- Collaborated in a team of six to develop a mixed fractions calculator, applying software engineering principles to solve complex problems.
- Utilized GitHub for robust version control and collaborative development, facilitating effective teamwork and project tracking.

Y86 Interpreter | Computer Systems I

Sep 2023 – Dec 2023

- Developed a Y86 interpreter from a foundational framework provided by my professor, enhancing my skills in C programming, Linux command-line operations, and CPU architecture.

Work Experience

Chick-fil-A, Norfolk, VA

July 2020 – August 2024

Back of House Team Member

- Trained new team members in various kitchen roles, fostering a culture of learning and efficiency across multiple positions.
- Maintained acute awareness of inventory levels, managing stock with a meticulous first-in-first-out system to ensure the freshest products for customers.
- Contributed to team efforts by assisting colleagues during peak hours, optimizing kitchen efficiency and service delivery.
